Abstract

Love for the motherland, pride and the sights of Uzbekistan.

Key words: motherland, homeland, neighborhood, flag.

INTRODUCTION

Every person comes into the world and calls the land he sees as his homeland. This place will be the only place will be the only place for him throughout his life we call this place homeland, the net of our heart. Our motherland feeds us from our youth provides us with everything that we need in our daily life. So we must appreciate it during all of our life. Homeland is the sacred ground where the navel blood of a person and his ancestors was shed. Homeland is the abode of ancestors, the country, the land where the nation grew up, its language, history, culture, traditions, and values are truly formed, grow and mature. It is the duty of each of us to take care of it. Today, the processes of integration and globalization are taking place in the world, people are striving for high technological development, and while we are using its positive results, there are also some dangerous processes, such as the spread of ideas that promote statelessness, such as cosmopolitanism. At this time, it is one of the most important tasks before us to educate the young generation in the spirit of patriotism. Realizing this, our president, government, and local state authorities pay great attention to it. In particular, in our Gulistan region, the work in this regard is well underway. Based on the decision of the governor of Gulistan region, a number of measures have been developed in order to form the spirit of patriotism in our citizens. For example, organizing meetings with representatives of the young generation in our region, with the participation of labor veterans, scientists, poets, famous athletes, calling for patriotism, praising the motherland. The country is where this person was born and raised land, since his infancy his beloved hearth, neighborhood and defined by the village. Homeland the word is in Arabic the place of birth, means motherland. Love for the country is highly human virtue In this regard, it is enough to remember the wisdom: "To love the country is from faith." We know that love for the Motherland does not choose place, space and time. Homeland can be in glaciers, deserts, grasslands. This feeling arises when a person is born and ends when he dies. Love for the motherland is instilled in the heart with mother's milk. Great scholars like Imam Bukhari, Imam Termizi, Burhoniddin Marginani, Qaffol Shoshi, Farabi, Abu Rayhan Beruni, Abu Ali ibn Sina, Al-Khorazmi, Mirza Ulugbek, Ahmad Ferghani because of their love for the Motherland. It is known from history that many of his works were associated with the name of the country. Our great ancestors Najmuddin Kubro can be a bright example of how to be a defender of the homeland. The leader of this sect, which has thousands of pupils, is one of the first to come to his defense when he learns that the Mongols have invaded. Seeing the popularity of Najmuddin Kubra among the people, the Mongol rulers of the homeland offered him to leave the city and go to the side of his choice. However, Najmuddin Kubro, who knows his country more than his own life, enters the battle against the invaders and is martyred while leading the army forward. Jalaluddin Manguberdi's skillful leadership, courage It is known from the pages of history that Jalaluddin Manguberdi's skillful military leadership, bravery and bravery surprised the ruler of the Mongol Empire,

Genghis Khan. He praised Jalaluddin and said: "There has never been a son like this father in the world. He is a victorious warrior like a lion in the desert, and as brave as a shark in the river." "The father needs such a son who can go out of the two whirlpools - the whirlpool of fire and water to the field of freedom" means that he recognized his bravery. In short, there were not a few people who conquered our country for thousands of years. However, patriotic leaders and heroes of the nation, who raised the flag of freedom against invaders in order to protect their country, fought tirelessly against the enemies of our people. Therefore, we can see that loving the country is a noble thing to protect. Therefore, love the country what a worthy cause to protect and treason to the Motherland we can see the great unforgivable thing. But it's no secret that some people leave their homeland and become patriots in other countries. According to the wise saying inherited from our forefathers, "Be the king of your country until you become a king in another country", these people have no respect for the country, humanity, or parents. we can see that the love for brother, sister, tribe, kinship and land did not reflect the result in relation to the neighborhood. It is surprising that some of them are joining various radical religious extremist organizations and movements. They are abandoning their country, family and even their parents by following the tricks of some other interested evil people... This kind of behavior does not correspond to the criteria of humanity. After all, a person should show self-sacrifice for the development of his Motherland and be ready to give his life in this way show that he should be ready to give his life. Therefore, every child should give his life for this country, live in a way that will be beneficial for the future. Just as a person is asked to be friend to a sincere person, the Motherland, like a mother, strives to take care of the person whose faith is the child of an idol. Only a person who has been a stranger even for a second understands the value of this place. There are no words to describe the country, no pen to write. May goodness and peace always last and last forever in the great land that holds the seeds of love in the longing hearts of everyone! In the middle of the night, when the stars are twinkling and the sky background is shining in harmony with the moon, the quiet atmosphere seduces a person. This music is combined with a sense of ease and a comfortable life, sometimes leading to sweet dreams. Patriotism is closely related to the love that gives this feeling. It is the Motherland that can give strength that is as close to the soul as the mother, and as close to the blood as the father. For everyone, the Motherland is a unique and unrepeatable miracle. Every person in the place where the sun gives its elegant light and warm magic from early morning A place that gives off its elegant light and warm magic from early morning creates a strange feeling in the heart of every person. For example, a bird in love with the fragrance of a beautiful flower will play a fragrant melody around you. One feels as if one has conquered the heavens, being proud of being a part of such a great abode that shares such unforgettable memories. Yes, this place is ours, all of us! To preserve the uniqueness and uniqueness of our land, we all need to come together. This is both a duty and a debt for us young generation! If there was no feeling of love for the country, the countries would have been destroyed and the land would have been in turmoil. However, when you hear about the lands witnessing destruction, you involuntarily rush to pray, "Don't let your eyes touch us, our Motherland." Why, today you hear that some sinful, breadless representatives of this country, who have not yet fully understood the environment, are hurrying to interfere in the destruction of another country. He is indebted to the spirit of his fathers and grandfathers who fought and became martyrs. We all know from the pages of history that our ancestors dreamed of today. Every child who is loyal to the country will cry when he sees the fate of his compatriots who are living in the war camp with arms today, or who are burning in the fire of remorse due to the policy of forgiveness. He wants to inculcate the concept of the homeland in his heart, wash away the hatred and pain in his tongue, and establish a bond of love. But, unfortunately, not everyone understands the concept of equal love or five fingers are not equal..."The value of the country is known to both the native and the stranger," says our wise people. Our grandfather, the founder of the great empire, Babur was also a companion until his death in the agony of this feeling. a thousand sufferings will be touched upon.

The motherland always has a far-reaching and radiant heat like the star of Mars, unattainable for those who are far from its soil. Only thanks for your peaceful night, your sleep and your peaceful rest. We are not exaggerating when we say that the time that brings you thanks for the peace of your night, your sleep and rest is the dream of some people and other restless lands. The tradition of the motherland is embedded in our blood, it is a feeling of gratitude that is deeply embedded in our hearts and eyes. Generations who are ready to appreciate its value should always take a step together. May this land always be filled with the light of happiness, which strives to live up to the height of the young generation, which is lined up like the heart of the motherland. Homeland is our beautiful city of Uzbekistan. Our country, which is described in the words of great ancestors who are full of longing and love, is always kind to our children like a living mother. Uzbekistan is unique in the world and a holy place for those who call themselves children of this country. The youth of the country are always ready to wave our flag on the world platform. The owner of tomorrow, whose heart is on fire, is adding strength to the power of Uzbekistan with the noble dreams of the young generation. Our country is becoming more beautiful than today's beauty. Loving the country and especially showing this love in practice is not an easy task. This requires a lot of courage, endurance, and endurance from a person. Interestingly, the Motherland does not require its children to sacrifice their lives every moment. The self-sacrifice that occurs on this path is the highest act of courage, and it occurs in unexpected situations. But the love of the Motherland requires a person's daily courage, which does not seem majestic at first glance, which is not much different from the ordinary activities of a person, but actually consists of very hard work. One of the sages said: "Motherland is a garden, loyal children of the Motherland need to water this garden with their heart's blood..." A person who considers himself a child of the motherland should serve with all his body and soul to revive the garden of the motherland. "Motherland begins at the threshold with the blood of the heart should serve to rejuvenate the homeland. As they say, "Motherland begins at the threshold", the Motherland begins with the conscience of each person. In other words, a small image of the Motherland lives in everyone's heart. Homeland is the air we breathe. It is a pride and honor for a person to realize that he is a part of the motherland. That is why it is necessary to love, appreciate and serve the country for its prosperity and honor.

Our homeland is the most beautiful and unforgettable place in our lives, we can not exchange it for anything, we must contribute to its development as it occupies previous place in our life. And also always preserve our lovely place.
